The 4-point response is scored 0-3 (Not at All=0, Just A Little=1, Quite a Bit=2, and Very Much=3). Subscale scores on the SNAP-IV are calculated by summing the scores on the items in the specific subset (1 - 10 and 11 - 20) and dividing by the number of items in the subset (10). This is referred to as the Average. The 5% cutoff scores for teachers and parents are provided. Compare the Average score with the related cut off score to determine if the score falls within the top 5% of scores.

These results should be input to the proper section, (parent or teacher), for automatic scoring and inclusion in the PADDs final reports. Additional scoring instructions are found in the manual if desired
